

Missouri Historical Society Museum

Project Overview

This 92,000 ft² (8,500 m²) expansion and 37,000 ft² (3,400 m²) renovation to the Missouri Historical Society's Museum is a three-level addition, connected to the original 1913 Beaux Arts Jefferson Memorial building by glass corridors and skywalks. Priorities in the design are energy conservation, integration of the designed system with the earth's ecosystems, use of natural systems wherever possible, and use of natural light.

Location:

St. Louis Missouri

United States

Project Owner:

Missouri Historical Society

Submitting Architect:

Hellmuth, Obata + Kassabaum Inc.

Project Site:

Previously Developed Land

Project Site Context/Setting:

Urban

Other Building Description:

Both new and renovation
